CERTIFICATE

This is to certify that this report titled “Tourism” embodies the original work done by Zulfarida, Namira Assalwa and Boazoma Surung Siegfried Batubara. Project in partial fulfillment of their course requirement at NIIT and CEP CCIT-FTUI UI.

Coordinator:

Indah Ayu yuliani, ST, MM

ACKNOWLEDGEMENT

All praise be to God Almighty, whose blessings have enabled the author to complete this project titled **"Tourism"** Deep appreciation and gratitude are extended to Mrs. Indah Ayu Yuliani, ST., MM., as a lecturer of class 2FSD1, along with other teaching staff who have always provided guidance and support. The author also sincerely thanks fellow students for their encouragement and expresses gratitude to all colleagues in the educational environment of CCIT-FTUI.

This project has been prepared as part of the learning assessment at CCIT-FTUI. Through this work, the author hopes to provide benefits to readers and listeners, enriching their knowledge and insight.

Finally, the author acknowledges that this project is far from perfect. Therefore, constructive criticism and suggestions are highly appreciated to help improve and refine this project for the benefit of all.

SYSTEM ANALYSIS

System Summary：

This tourism project is a website that provides information about various tourist attractions in Tana Toraja. This website helps users to explore tourist destinations, cultural experiences, culinary information more easily. The website has several main menus, such as Home, Information, Culture, Gallery and Location, all of which are designed to be responsive.

The website structure is built using HTML5 programming language and consists of several interactive pages.

We used JavaScript for the animations. Menus that appear on mobile devices and PCs also use JavaScript.

To make the interface more attractive, we implemented a CSS framework to make this website more responsive and properly accessible on various devices, including desktops, tablets, and mobile phones. To test responsiveness, developers used the Moto G Power, the mobile Nest Hub Max, and the desktop for optimization on PC devices and for optimization on mobile devices. The website design was also enhanced with custom CSS to provide a better user experience.

Technology:

The interface design of this website was created using Figma, where the layout and UI components were designed before implementation. The developed design was then implemented using Visual Studio Code for UI development.

ACTIVITY LIST

No.	Activity Description	Planning Date	Actual Date	Respons	Remarks
1.	Create the wireframe design using Figma	14 March 2025	14 March 2025	Namira, Zulfarida	Three wireframe design (Desktop, Tablet, Mobile)
2.	Create the website structure using HTML5 and Designing Using CSS	15 March 2025	16 March 2023	Zulfarida, Namira	Page Home, Information, Culture, Galery, Location
3.	Perform validation and animation using JavaScript	18 March 2029	19 March 2025	Zulfarida	One javascript file
4.	Test responsive page on Nest Hub Max and Moto G Power	19 March 2025	20 March 2025	Boazoma	Success
